

FRANCESCA CARLOTTA CHITTARO

Professional address

Université de Toulon
Batiment X
Avenue de l'Université
83957 La Garde cedex, France
Tel. : 04 94 14 23 49
E-MAIL: francesca-carlotta.chittaro@univ-tln.fr
francesca.chittaro@gmail.com

Home address

75, bd Docteur Cunéo
83000, Toulon, France

Personal Data

Date of birth: September 2nd, 1979
Birthplace: Ovada (AL), Italy
Citizenship: Italian

1 Curriculum Vitæ

1.1 Present occupation

- Since September 2012: Maître de conférences (*Assistant Professor*) at IUT- Université de Toulon (France).

1.2 Post-doc fellowships

- October 2011 - August 2012: ATER (*research and teaching fellow*) at IUT- Université de Toulon (France). Scientific Advisor: Prof. J.-P. Gauthier.
- May-October 2011: post-doc fellowship at the Centre des Mathématiques Appliquées (CMAP) of École Polytechnique, Palaiseau (France). Scientific Advisor: Prof. Y. Chitour.
- November 2009 - May 2011: post-doc fellowship at the Laboratoire des signaux et systèmes (L2S), Supélec, Gif-sur-Yvette (France). Scientific Advisor: Prof. Y. Chitour.
- November 2007 - October 2009: post-doc fellowship (*assegno di ricerca*), Dipartimento di Matematica Applicata "G. Sansone", Università di Firenze, Italy. Scientific Advisor: Prof. G. Stefani.

1.3 Education

PhD in Mathematics

November 2003 - October 2007 : PhD in Mathematics at SISSA/ISAS (sector of Functional Analysis and Applications), Trieste, Italy, with fellowship.

- Defense: October 25th, 2007;

- Supervisor : Prof. A. A. Agrachev (SISSA/ISAS, and Steklov Institut of Mathematics, Moscow, Russia);
- Referees : Prof. L. Rifford (Université de Nice, France), Prof. A. Sarychev (Università di Firenze, Italy);
- Title of the Thesis: *Hyberbolicity and Curvature in Dynamics and Control*.

Degree

September 29th, 2003 : Degree in Physics, Università di Trieste, Italy.
Mark : 110/110 cum laude.

- Supervisor : Dr. Fabio Benatti (Università di Trieste);
- Title of the Thesis: *Entropia dinamica in sistemi discreti con noise (Dynamical entropy in discrete systems with noise)*.

1.4 Informatics skills

- Programming languages: Fortran77, C.
- Computational softwares: Mathematica, Octave, Simulink, Scicos, Mathcad.

1.5 Languages

Italian, English, French.

2 Scientific Activity

Keywords: Geometric control theory, optimal control, quantum control, dynamical systems.

For a detailed description of my research interests, I refer to my research statement.

2.1 Talks

2.1.1 Invited conferences and workshops

- April, 3rd-5th, TUM-IAS Workshop on Quantum Control Theory: Mathematical Aspects and Physical Applications, TUM, Munich, Germany. Talk: *Asymptotic ensemble stabilizability of the Bloch equation*.
- December, 8th-12th, International Conference on Geometric Analysis and Control Theory, Sobolev Institute of Mathematics, Novosibirsk, Russia. Talk: *Asymptotic ensemble stabilizability of the Bloch equation*.
- March, 9th-11th, 2015, Journées bisontines sur le contrôle quantique : systèmes d'EDPs et applications à l'IRM, LMB, Université de Franche Comté, Besançon. Talk: *Ensemble stabilizability for two-level quantum systems*.
- October 28th-30th, 2013, Journées scientifiques du Laboratoire LAROMAD, University of Tizi-Ouzou, Algeria. Talk: *Conditions suffisantes pour l'optimalité des extremaux singulières pour le problème du temps minimum*.
- April 18th–19th, 2013, Conference on Non Linear Control: Geometric Methods and Applications, Florence, Italy. Talk: *Minimum-time strong optimality of a singular arc: the multi-input non-involutive case*.
- January 31st–February 2nd, 2012, Workshop on Geometric Control for PDE's-GCPDES-2012, Beirut, Lebanon. Talk: *Quantum control via Adiabatic Theory*.
- September 12th–16th, 2011, 25th IFIP Conference on System Modeling and Optimization, Berlin, Germany. Talk: *Sufficient second order conditions for multi-input singular extremals*.
- April 3rd–8th, 2011, BIRS Workshop on Quantum Control, Banff, Canada. Talk: *Quantum control via Adiabatic Theory*.

2.1.2 Invited Seminars

- December 17th, 2014, Seminars MODANT of Laboratoire Jean Kuntzmann, Université Joseph Fourier, Grenoble, *Control design for quantum systems*.
- June 23rd, 2014, Groupe de Travail en Physique Mathématique de Toulon, *Contrôle adiabatique de l'Équation de Schrödinger via intersections coniques des valeurs propres*.
- April, 4th, 2013, IMATH- Université du Sud Toulon–Var, *Minimum-time strong optimality of a singular arc: the multi-input non-involutive case*.

- December 20th, 2010, Université de Florence, Italie, *Modelli di Controllo Ottimo per la locomozione umana*.
- November 29th, 2007, Université de Nice, *Smooth optimal synthesis for infinite horizon variational problems*.

2.1.3 Participation to conferences and workshops

- December, 15th-18th, 54th IEEE Conference on Decision and Control, Osaka, Japan. Talk: *Approximate controllability by adiabatic methods of the Schrödinger equation with nonlinear Hamiltonian*.
- May 29th–31st, 2013, Workshop on Conical intersections in Mathematical Physics, IHP, Paris, France. Talk: *Geometry of conical intersections: constructive methods for adiabatic control*.
- December, 10th-13th, 52nd IEEE Conference on Decision and Control, Florence, Italy. Talk: *Minimum-time strong optimality of a singular arc: extended Dubins Problem*.
- June 29th–July 4th 2012, International Conference on Differential Equations and Dynamical Systems, Suzdal, Russian Federation. Talk: *Optimal control problems for the human locomotion: stability and robustness of minimizers*.
- December 8th–11th, 2010, Workshop on Quantum Control, IHP, Paris, France. Talk: *Quantum Control via Adiabatic Theory and intersection of eigenvalues*.
- October 24th–28th, 2010, Workshop on Nonlinear Control and Singularities, Porquerolles, France. Talk: *Quantum Control via Adiabatic Theory*.
- April 20th–21st, 2009, Meeting on Mathematical Control Theory: Controllability, Optimization, Stability (PRIN 2006), Turin, Italy. Talk: *Estremali singolari per problemi di tempo minimo con controlli vettoriali: una condizione sufficiente*.
- June 17th–22nd, 2008, International Conference on Differential Equations and Topology, Moscow, Russian Federation. Talk: *Optimal synthesis in infinite horizon problems*.
- May 30th–June 1st, 2007, Workshop on Control, Optimization and Stability di Non-linear Systems: Geometric and Analytic Methods, SISSA-ISAS, Trieste, Italy. Talk: *On the optimal synthesis for infinite horizon variational problems*.

2.2 Publications

2.2.1 Journals

1. F. C. Chittaro, G. Stefani *Minimum-time strong optimality of a singular arc: the multi-input non involutive case* ESAIM-COCV, (2016), 22, No. 3, 786–810
2. F. Jean, P. Mason, F. C. Chittaro *On the inverse optimal control problems of the human locomotion: stability and robustness of the minimizers*, Journal of Mathematical Sciences, 195, 3 269–287 .
3. U. Boscain, F. C. Chittaro, P. Mason, M. Sigalotti *Quantum Control via Adiabatic Theory and intersection of eigenvalues*, IEEE-TAC, (2012) vol 57, n. 8, 1970–1983.
4. F. C. Chittaro, G. Stefani *Singular extremals in multi-input time-optimal problem: a sufficient condition*, Control and Cybernetics, (2010) 39, No. 4, 1029–1068.

5. A. A. Agrachev, F. C. Chittaro *Smooth Optimal Synthesis for infinite horizon variational problems*, ESAIM-COCV, (2009), **1**, 173–188.
6. F. C. Chittaro *An estimate for the entropy of Hamiltonian flows*, J. Dynamical and Control Systems, (2007), **13**, 55–67.

2.2.2 Proceedings and conference papers

1. F. C. Chittaro, P. Mason *Approximate controllability by adiabatic methods of the Schrödinger equation with nonlinear Hamiltonian*, Proceeding of CDC 2015
2. F. C. Chittaro, G. Stefani *Minimum-time strong optimality of a singular arc : extended Dubins problem* Proceeding of CDC 2013.
3. F. Jean, P. Mason and F.C. Chittaro *Geometric modeling of the movement based on an inverse optimal control approach* Proceeding of CDC 2013.
4. U. Boscain, F. C. Chittaro, P. Mason, R. and M. Sigalotti *Controllability of the Schrödinger equation via adiabatic methods and conical intersections of the eigenvalues*, Proceeding of CDC 2012.
5. U. Boscain, F. C. Chittaro, P. Mason, R. Pacqueau and M. Sigalotti *Motion planning in quantum control via intersection of eigenvalues*, Proceeding of CDC 2010.
6. Y. Chitour, F. Jean, P. Mason and F. C. Chittaro *Analysis of optimal control models for the human locomotion*, Proceeding of CDC 2010.
7. A. A. Agrachev, F. C. Chittaro *Extremals flows and infinite horizon optimization*, in the book *Mathematical Control Theory and Finance*, A. Sarychev A. Shiraev M. Guerra and M. do Rosário-Grossinho Eds., Springer-Verlag.

2.3 Preprints

1. F. Chittaro, J.-P. Gauthier *Asymptotic ensemble stabilizability of the Bloch equation* arXiv: 1704.02822
2. R. Azouit, F. Chittaro, A. Sarlette, P. Rouchon *Towards generic adiabatic elimination for bipartite open quantum systems* arXiv: 1704.00785
3. F. C. Chittaro, P. Mason *Approximate controllability via adiabatic techniques for the three-inputs controlled Schrödinger equation* arXiv: 1502.06814

3 Administrative and teaching activity

3.1 Administrative activity

- Organizer of workshops, seminars and conferences:
 - Main Organizer (with L. Poggiolini) of the *Workshop on Mathematical Control Theory - with a special session in honor of Gianna Stefani*, that will be held in Porquerolles (France) in June, 27th–30th, 2017. <http://mct.univ-tln.fr/>
 - Organizer of the Séminaire de Théorie de Contrôle de Toulon. <http://www.lsis.org/seminaire-theorieducontrol/>
 - Organizer of the *Workshop on Nonholonomic Mechanics and Geometric Control Theory*, IHP, Paris, November, 25th-28th, 2014. <http://nholmech-goc.lsis.org/>
 - Organizer of the *Workshop on Geometrical Models in Vision*, IHP, Paris, 22nd-24th, 2014. <http://gmvision.lsis.org/>
 - Organizer of the international conference “BIO Inspired Optimal Systems”, Toulon, 9th-10th April 2013. <http://glotin.univ-tln.fr/bio2s>
 - Organizer of the *Workshop on Quantum Control*, IHP, Parigi (France), December 8th-11th, 2010. <http://www.cmapx.polytechnique.fr/~boscain/quantum-control.html>
- Project lead (for Toulon) of the *Agreement of Cultural and scientific cooperation* between the University of Florence and University of Toulon.
- Member of the committee for a position of *Maître de conférences*, section 26, number 4057 at INP - Toulouse (spring 2014).
- Peer reviewer for international journals and conferences:
 - ★ Journals: J. Global Optim., Acta Appl. Math., IEEE-TAC, Journ. Dyn. Contr. Sys., Int. Journal of Control, Journal of Mathematical Sciences, ESAIM-COCV, MCSS, System & Control Letter, J. Math. Anal. and Appl., SIAM J. Contr. Opt..
 - ★ Conferences: CDC 2010, ACC 2011, CDC 2013, CDC 2015, CDC 2016.
- Participation to research projects
 - ★ Project *Partenariat Hubert Curien - Tassili 2015 PHC15MDU941 – Critères non-lisses en contrôle optimal* (coordinator : Pr. J.-P. Gauthier)
 - ★ PEPS CoMoMo *Contrôle et Modélisation de la Motricité* (coordinator : Dr. P. Mason)
 - ★ PRIN 2008 (National Interest Research Projects) project *Metodi geometrici per dinamiche controllate e applicazioni (Geometrical Methods for controlled dynamics and applications)* (national coordinator: Prof. A. A. Agrachev).
 - ★ PRIN 2006 (National Interest Research Projects) projet *Teoria Matematica del Controllo: Controllabilità, Ottimizzazione, Stabilità (Mathematical Theory of Control: Controlability, Optimization, Stability)* (national coordinator: Prof. A. A. Agrachev).

3.2 Student supervision

3.2.1 Master students

- Toufeyili Mhoma, student of the Master 2 *Mathématiques Spé. Optimisation et Physique Mathématique* of Université de Toulon. Title of the manuscript: *Contrôlabilité de l'équation de Schrödinger bilinéaire*. (academic year 2014-2015)
- Tetiana Klymchuk, student of the Master 2 *Mathématiques Spé. Optimisation et Physique Mathématique* of Université de Toulon. Title of the manuscript: *How many are multiple eigenvalues ?*. (academic year 2014-2015)
- Dani Hammad, student of the Master 2 *Differential Geometry* of Lebanese University, Beirut. Co-supervision with Ali Wehbe and Amina Mortada. Title of the manuscript: *Sub-Finsler problem for Heisenberg distribution : the L^1 norm*. (academic year 2015-2016)

3.2.2 PhD students

- (since October 2014) Fazia Harrache, PhD student of Université Mouloud Mammeri, Tizi-Ouzou (Algeria) and Université de Toulon. Co-supervision with Mohamed Aidène (Université Mouloud Mammeri) and Jean-Paul Gauthier (Université de Toulon). Subject: *Sub-Finsler metrics in dimension 3*.

3.3 Teaching activity

In charge of courses of Automatic Control and Applied Mathematics at l'IUT of Toulon, Dep. GEII. (for more details on the courses, see my teaching statement).

I also made the following interventions:

- University of Florence (Italy), Faculty of Civil Engineering - exercise lectures (20 hours) in Calculus of function of several variables (in charge of the course: Prof. G. Stefani), and Faculty of Mechanical Engineering: exercise lectures (10 hours) in Calculus of function of several variables (in charge of the course: Prof. G. Anichini), academic year 2008-2009.
- *Master Image & Systèmes - spécialité SIS*, University of Marseille, *Optimal Control* (in charge of the course: Prof. N. M'Sirdi) , (8 hours) , academic years 2012-2013 and 2013-2014.

and I was in charge of the following courses:

- Polytech' Marseille, Diploma *Ingénieur Génie Industriel et Informatique* (5th year), *Optimal Control* (28 hours), academic year 2014-2015.
- Lebanese University (Lebanon), Master 2 in Differential Geometry, *Geometric Optimal Control* (14 hours), academic years 2015-2016 and 2016-2017.
- Université de Toulon, Master 2 Physique et Sciences de l'Ingénieur Spé. *Vision Commande (VC), Planification de trajectoire en robotique* (22 hours), academic year 2016-2017.
